

## *Trident expands rep network for sludge dewatering solutions*

**Abbotsford, BC - October 15<sup>th</sup> 2018** Trident continues to expand its network of manufactures reps across the United States. Over the past few weeks a number of high profile rep firms have been brought on board to help grow Trident’s market share in the sludge dewatering sector. At Weftec 2018 in New Orleans, Trident and Coombs Hopkins have formally agreed to a partnership that will allow the wastewater sales experts to represent Trident’s line of sludge dewatering and wastewater equipment in four west coast states.

Kerry Doyle, CEO at Trident Processes Inc., is pleased to welcome the Coombs Hopkins rep force. “We are excited for the opportunity to partner with Coombs Hopkins. Their team has a proven track record and the first projects have already been initiated in their territories.” Doyle explains. He continues “This partnership aligns perfectly with Trident’s expansion strategy and it will complement Coombs Hopkin’s line of wastewater equipment and ultimately offer value to their customers.”
